

**Business
Continuity Plan
(Disaster Recovery
Program)**

*Preparing
for a worst case
scenario*

Background

A billion-dollar company requested assistance in bringing its IT Business Continuity Plan up to date. Senior management asked PLS to review the current structure, recommend improvements to the process, and implement the necessary changes ~ all within a narrow timeframe.

Solution

PLS led all the stages of the project, including plan development, vendor selection, contract negotiation, disaster plan creation and multiple disaster recovery exercises. PLS also created a comprehensive applications portfolio, which specified service level requirements for disaster recovery. PLS and the IT Operations team conducted multiple full system recovery exercises in support of a concurrent data center relocation project.

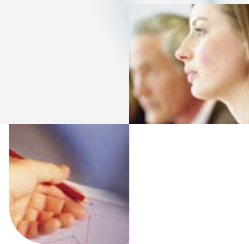

Results

All disaster recovery exercises were successful, and contract negotiations with vendors reduced annual disaster recovery costs by 25%.
